**COVID-19 related research**

The Faculty of Medicine is considering co-funding for COVID-19 related research to support additional costs for use of research infrastructure, establishment of research infrastructure and data capabilities. For this, we want get an overview if there is a need for co-funding for ongoing or planned COVID-19 related research.

**Name:****Department:**

Please inform us if you have additional costs related to ongoing projects or planned projects and specify in which area (mark with X):

	Collection and coordination of samples, studies and data to facilitate shared clinical, translational and epidemiological research
	Technology development, including diagnostic and therapeutic tools and data/bioinformatic ( <i>e.g.</i> protein expression)
	Research projects (translational, clinical and epidemiological)

Mark with X:

Do you plan to reallocate your VR grant to use for COVID-19 related project?

Yes

No

Have you applied for grant from the SciLifeLab open COVID-19 call?

Yes

No

**Attachments:**

Please add a one-page project proposal and a budget that describe costs for critical reagents, consumables, materials, use of research infrastructures (e.g., user fees) and research infrastructures. We do not plan to primarily fund staff, so please confirm that you have the personnel needed for the planned research, or explain how additional instant funding could be used immediately for current staff costs.

All proposals should be placed in an international context and contribute to open science when possible.

Send the proposals, no later than **21<sup>st</sup> April** to
